

THE MICHIGAN DIFFERENCE

1987 OUTBOARD & STERN DRIVE CATALOG • MICHIGAN WHEEL CORP.

WE DEMAND EVEN MORE PROPS THAN YOU DO

The right prop can mean increased speed and range, better engine efficiency, and improved overall performance from your boat. Where do you find such a prop?

Right here in the pages of this catalog.

At Michigan Wheel, we're just as interested as you are—even more so—that the propeller on your boat gives you perfect performance.

As the world's largest manufacturer of propellers, we put more time, energy and resources into producing better propellers than anybody else in the world. That's the Michigan Difference.

Michigan engineers are relentless in their pursuit of the perfect propeller. Every design, every feature of a Michigan prop is proven on our own waterways, by experienced engineers who run thousands of miles of tests every year. Michigan props are carefully designed and engineered to give you the best value you can get in a propeller.

UNCOMPROMISED PERFORMANCE

Many original equipment propellers are, understandably, a compromise to meet a range of average conditions for many kinds of boats. This limits their use and performance, due to the great variety of hull styles and loads.

With Michigan, you don't have to settle for a prop that is "close" to the performance you want. Whatever kind of boat you own, whether you use it for waterskiing, fishing or cruising, you will find a Michigan propeller that is practically custom crafted to your specific needs.

Michigan gives you unmatched selection and variety. Over 400,000 different combinations of diameter, pitch, rotation, shaft size and metals are available.

BUY WITH CONFIDENCE

Michigan props meet or surpass all original equipment standards.

Expert metallurgists select only the finest grade alloys for Michigan props. No supplemental fillers are used.

This means that Michigan aluminum props offer you greater strength, better repairability and remarkable operating characteristics at competitive prices.

Michigan bronze props are stronger, easier to repair than all other propellers. And our Michigan stainless steel props offer unmatched strength and durability.

THE DURABILITY DIFFERENCE

Michigan props are made to withstand most bumps and bruises, which makes for safer boating. And easier repairs.

With a Michigan prop, you are spared the time, expense and hassle of frequent repairs. Since most original equipment propellers are made from the die cast method, they can be difficult to repair. They are brittle, break easily in the straightening process and are extremely difficult to weld.

What's our secret? Michigan props are made from the superior sand cast method. And they are made of our *exclusive* high-strength alloys—MICHALUM® (aluminum props), MICHALLOY-K® (bronze props) and MICHALLOY-S™ (stainless steel props). In addition, uniform strength throughout the propeller is assured through Michigan's new electric furnace system.

PERFORMANCE FROM OUR

In the event that repair is needed, you save money because a Michigan prop can be repaired at approximately one third to one half the cost of a new propeller. And the result is as good as new; our exclusive Machined Pitch™ process allows us to repair to original specs with pinpoint accuracy.

An added benefit: you can even change propeller pitch when repairing to improve performance. Ask anybody that repairs propellers. They will tell you, very simply, that Michigan props are the easiest props to repair.

INCREASED ACCELERATION

For acceleration and pickup like you never had before, get a Michigan propeller with cupped blade edges. Made for light, fast hulls, our cupped design increases speeds on fast bottom boats, and eliminates vibration.

All aluminum and bronze propellers in this catalog can be ordered with the cupped design.

Another way to increase your boat's acceleration is with a Michigan stainless steel prop. Tests show that stainless steel permits substantial performance gains in acceleration and speed, as well as improved fuel economy.

A Michigan stainless steel prop is *five times stronger* than an aluminum prop. Which means less damage, and more time for fun on the water. Only Michigan Wheel polishes its entire line of stainless propellers to gleaming beauty, which minimizes drag and further inhibits corrosion. You'll find Michigan stainless steel props indicated with red numbers within this catalog.

THE MICHIGAN DIFFERENCE

Since 1903, Michigan Wheel has been putting more into our props than anybody else. And that's precisely why you get so much out of them. For uncompromised performance ... for superior durability ... for unmatched selection ... run with a Michigan prop.

**CARRY
A SPARE**

**OAR
ELSE**

The last thing you want to do is ruin your weekend by getting stuck without a spare propeller. A good practice is to install a Michigan prop on your engine and keep a Michigan prop as a spare. So play it safe and always keep a spare prop on board.

COVER: Performance through technology. Michigan engineers use computer-generated techniques and state-of-the-art milling procedures for precise propeller pattern development, which results in better performance for you.

WE SERVICE WHAT EVERYBODY ELSE SELLS

When something happens to your original equipment propeller, you take it to your boat dealer. Regardless of manufacturer, what most dealers do is rely upon the international network of

authorized Michigan Wheel service stations. There are over 70 such stations throughout the United States, Canada and overseas. So even your original equipment propeller will probably be repaired by Michigan Wheel.

Authorized Michigan Wheel service stations are operated by highly skilled and factory trained workers. Welding is handled by certified welders. But most importantly to Michigan propeller owners is the added fact that their propellers are indexed, which means that each repair station with their same matching pitch blocks can custom repair your Michigan propeller to its original specifications. This also applies to the repair and replacement of cushioned-hub propellers for gear-shift engines.

FACTORY REPAIR

Repair prices effective January 1, 1986.

OUTBOARD/STERN DRIVE Suggested factory list prices.

Diameter	Price	Cupped
6" -11"	\$19.00	\$25.00

STERN DRIVE PROPS

Stern drives require special attention when it comes to propping because there are so many variables such as boat length, hull displacement, condition of use, etc. This selector is

your starting point but your Michigan Wheel dealer is particularly well qualified to assist you in choosing a propeller for achieving optimum operating results.
