POWER

The native American Indian carried heavy loads great distances. Silently, rapidly, he would push along—steadily and untiringly.

That's the sort of dogged, unfailing power that has been built into the Indian Silver Arrow Outboard. For twenty-seven years Indian Motorcycle engineers have been building successful small motors—compact, powerful engines for the gruelling duties demanded of a motorcycle. Indian Motorcycles hold all records for endurance. Endurance—dependable power—is what you want in an outboard motor. See this remarkable power plant before you buy any motor.

Descriptive literature and dealers' names sent on request. Convenient service stations everywhere.
